

PRESS RELEASE APRIL 2018

LET FREEDOM RAIN

From the international award-winning design team at Phoenix comes the next generation of design innovation and sophistication; NX Showers.

With a reputation for impeccable design, Phoenix has completely re-imagined their shower presence, taking their award-winning creative direction and crafting products that not only look incredibly luxurious, but give the user a uniquely invigorating shower experience.

The three collections within the NX Showers range: Cape, Quil and Vive, each include a:

- Twin Shower
- Rail Shower
- Hand Shower
- Arm & Rose Shower

Cape

With a contemporary rectangular design edge, Cape offers a strong and immersive showering experience that will relax your body and your mind. The carefully cultivated design is punctuated by refined details and low-profile nozzles that provide an eco-friendly, yet enveloping cleanse.

Quil

Distilled to its fundamental elements with refined surfacing and thoughtful design, Quil affords any bathroom a sense of simple and stylish elegance. Providing a dense droplet-like experience, the shower becomes something to be savoured. While its expertly crafted nozzles give the water a spa-like sensation, our commitment to water efficiency remains.

Vive

The Vive range is intensely modernist in its design approach, offering a collection that will fuse seamlessly with any modern interior, especially those wanting to push the limits beyond trend. The sophisticated nozzle design delivers a streamlined and invigorating showering experience despite its economical use of water.

With three individual designs, there is something to suit all sensibilities but at the core of NX is a focus on functionality and quality, "nothing has been compromised", says Phoenix Sales & Marketing Director Michael Phelan. Each collection features a market-first velvet-touch hose, tested for easy cleaning and seamless manoeuvrability, gracefully hanging when placed on the bracket.

The NX Showers have been engineered with absolute precision for a distilled design, un-matched on the market. To top this off, the NX Showers are backed by a lifetime warranty, which is a testament to their design and engineering quality.

Just step in and let freedom rain.
